-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1644

1. Claims 1-58 are pending.
2. A supplemental Non-Final office action is being set forth since because of an oversight on the part of Examiner, claim 6 was not included in the elected group to be Examined. As such a new office action, Non-Final has been set forth below.
3. Applicant's election without traverse of Group I, claims 1-3 and 6-7 in the reply filed on 9-28-04 is acknowledged.
4. Claims 4-5 and 8-58 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9-28-04.
5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3 and 6-7 are rejected under 35 U.S.C. 102 (a) or (b) as being anticipated by Riemen et al. (21 on the IDS submitted 8-16-02).

Riemen et al., teaches measuring NDPK activity by measuring NTP production in tracheal epithelial cells from mice with and without the CFTR gene mutation, a mutation that causes cystic fibrosis. It is noted that the trachea is part of the lungs, thereby meeting the limitation of claim 6, lung cell sample. It is also noted the base claims have no correlation step, thereby opening the claims to read upon the prior art reference of Riemen et al.

It is noted the rejection is made under 35 USC 102(a) or (b) because as far as the Examiner can ascertain, the abstract was presented at a meeting in April of 1998, but it is not

Art Unit: 1644

known when the abstract book was made publicly available to the meeting attendees. As it is common for the abstract book to be mailed ahead of the meeting date, and applicant is an author on the reference being cited, it is incumbent upon applicant to ascertain the public availability of the abstract book, so the appropriate US statute can be applied.

The claimed invention is anticipated by the prior art teachings.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-3 and 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In base claims 1 and 7, there is no correlation step linking the determination or classification step with NDPK activity or function, as such the claim is indefinite.

8. The fax number for the organization where this application or proceeding is assigned is 571-273-8300.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
